Attn: Rob Packard, President

Dear Sir,

I recently had your company replace an existing skylight replaced with a new electric Velux unit.

First of all...why did I wait so long to get this skylight? It is great!

But more important than the great product was the service we received from your company. From the young lady at the front desk to the installers, the service was beyond my expectations. I placed a VERY tight time line on Stan and he came through. And the two gentlemen who did the install were fantastic!

I just wanted you to know just how impressed we were with the service, and the product, that we got from your organization and we will be proud to recommend your company to anyone who wants quality work and a great product.

Please pass along our thanks to all your employees for a job well done!

Sincerely yours,

Steven E. Plant
